### PROFILE

Highly motivated individual with a strong work ethic and excellent public speaking skills. Passionate about technology and eager to learn new concepts and tools. Seeking a challenging Developer role to leverage my skills in both frontend and backend development to create dynamic and innovative web applications.

### PROFESSIONAL EXPERIENCE

#### Vitra.ai, Software developer

July 2024 – Present | Bangalore

- Developed and maintained core features for **short.video** , a web-based video creation and editing platform, using **Next.js**, **NestJS**, and **TypeScript**.
- Designed and integrated a custom authentication system** for short.video , ensuring secure login, session handling, and role-based access.
- Built scalable APIs using **PostgreSQL** with Sequelize ORM in NestJS, resolving caching issues across frontend and backend with optimized database queries and structured data fetching.
- Integrated **Redux Toolkit (RTK)** on the frontend and built compatible, performant RESTful APIs on the backend for seamless state management and data sync.
- Developed and optimized **filtering APIs** for both image and video assets, enabling advanced content filtering in the video editor.

#### Accenture, Application Development Associate

March 2022 – September 2022 | Gurugram, INDIA

- Worked on development and support of enterprise-grade applications, contributing to feature enhancements, bug fixes, and performance improvements across production systems.
- Debugged and resolved application-level issues through log analysis, code inspection, and database validation, maintaining an **80% issue resolution rate**.
- Assisted in backend data handling and API troubleshooting, ensuring reliable data flow between application layers and external systems.

### SKILLS

**Programming Language** — JavaScript, Python, **Front-End Technologies** — HTML, CSS, Bootstrap, React.js, Angular, JavaScript, Next.js, webpack, redux, redux-thunk, JIRA, and Jenkins, **Backend Technologies** — Node.js, Nest.js, Express.js, FastAPI, Django, postman, Redis, Spring boot, REST API, **Database Management:** — MongoDB, MySQL, **Operating System** — Linux, UNIX, Windows, macOS, **Soft Skills** — Creative, Innovative, Problem Solving, Adaptability, Analytical Skills, Strong Communication, Leadership

### PROJECTS

#### Short.video – AI-Powered Video Creation Platform

**short.video**  is an AI-driven video creation and editing platform that empowers users to transform long-form content into short, engaging videos using intelligent automation tools.

**Technologies Used:** Next.js, NestJS, PostgreSQL, Sequelize, TypeScript, RTK, Redis, Hero UI, FFmpeg

- Custom Authentication:** Implemented a secure and scalable authentication system using JWT and session-based login.
- AI Video Editing:** Enabled automatic generation of short videos from long content using AI-powered scene detection and trimming.
- Text-to-Video Automation:** Integrated AI to generate video scenes from script inputs and support multilingual voiceovers via Text-to-Speech.
- Reusable Components:** Designed modular frontend components using Hero UI and custom logic for responsiveness and performance.
- Backend APIs:** Developed efficient REST APIs with NestJS and Sequelize; implemented filter APIs for images and videos.
- State Management:** Integrated Redux Toolkit for state synchronization with backend services and caching improvements.

#### LithoAyas

September 2025

- Built and deployed the complete **LithoAyas**  **web application and landing page**, owning end-to-end development across frontend, backend, and system architecture.
- Developed a scalable **Next.js + TypeScript frontend** and a **NestJS backend**, implementing secure APIs, real-time communication using **WebSockets**, and robust request validation with **Zod**.
- Designed and optimized backend infrastructure using **PostgreSQL**, **Sequelize ORM**, **Redis**, and **RabbitMQ**, enabling efficient data handling, caching, and event-driven workflows.

### EDUCATION

**INTEGRATED INSTITUTE OF TECHNOLOGY,**  
BACHELOR OF COMPUTER APPLICATION(Computer Science)

New Delhi, INDIA

### ACHIEVEMENTS

**Contributed to LithoAyas**, an AI-driven geoscience company, by designing and maintaining their landing page and frontend UI components. Helped elevate their brand and digital presence by delivering a responsive, performance-optimized interface aligned with their mission of transforming subsurface exploration using AI.

### COURSES

**Full Stack Development Bootcamp - JavaScript, UpGrad**

May 2023 – November 2023
